Becoming a registered dental nurse is a tremendous achievement, but for many it is just the start of an exciting career in dental nursing. Whether you’ve qualified as a dental nurse through the National Examining Board for Dental Nurses (NEBDN) or not, you can progress your career with one of our Post-Registration qualifications.

NEBDN aims to be the awarding body of choice for all dental nurses through our ability to offer high calibre, widely renowned qualifications which are recognised for their quality, value and relevance to the ever-changing dental industry.

The overall vision of NEBDN is:

“To be the leading provider supporting excellence in Dental Nurse education and development in the UK.”

We have held a vision for over 75 years to ensure the education of Dental Nurses has been supported. We aim to not only improve education, but be at the forefront of supporting the development of qualifications for the profession.

These qualifications are provided across Ireland and the UK via a network of accredited course providers.

Each course provider is subject to regular quality assurance monitoring to ensure that NEBDN standards are maintained.

A number of our providers offer all of our qualifications whereas others focus on a specific area of training. The best way to find out who delivers the course you are interested in is to search under the qualifications section of our website www.nebdn.org

We aim to meet the changing oral health needs in the UK by providing industry specific Post-Registration qualifications which are included in this brochure.

Thank you for choosing NEBDN to further your career in Dental Nursing.

Kate Kerslake
CEO
Implant Dentistry is a highly advanced, specialised dental skill which is now a widely available treatment across the UK and overseas. It combines surgical skills with restorative expertise to help rebuild the dentition. Some examples of damage could be due to trauma, caries or malignancy. These cases require meticulous planning and exacting standards to ensure an optimum result for each patient.

Dentists in this field require a high calibre dental nursing support team capable of dealing with the many challenging aspects of implantology and patient care. Dental Implant Nursing is an exciting field of dentistry, in which qualified dental nurses are rightly recognised as a major part of the care team.

The role of the dental implant nurse includes surgical and restorative assistance during the many stages of implant treatment. As such, you need to have an enhanced knowledge of dental anatomy and physiology to allow understanding of the implant biomechanics. Having the ability to communicate effectively with patients to explain these complex treatments will become easier with this enhanced knowledge.

We offer the certificate in Dental Implant Nursing which sets a very high standard of education in this area of dentistry. This qualification may represent opportunities for career development and enhance skills.

“Being awarded this qualification will demonstrate to any employers that you have had significant training in all the components of implant treatment.”
Aims

NEBDN aims to provide you with:

- A standardised and quality assured learning experience with one of our accredited course providers
- An independent and objective assessment of knowledge
- A portfolio of evidence of practical experience in the form of a detailed Record of Competence
- The opportunity to gain a nationally recognised qualification in this complex and evolving field of dentistry

Who is it for?

This qualification is open to all registered Dental Nurses who aspire to be involved in Implant Dentistry. It is important to ensure that you will have enough exposure to implants to allow completion of the Record of Competence.

What are the benefits?

- Our qualifications are nationally recognised by employers.
- Our course providers are accredited against our standards, ensuring that you get a fully supported learning experience and the best preparation for practice.
- Our formal assessment and Record of Competence are based on modern educational practice, giving you evidence of your fitness to practice.
- Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
- Our Post-Registration qualifications support personal development and enhance skills for career progression.
Entry requirements

You must:

- Be registered with the General Dental Council or the Irish Dental Council
- Be enrolled with a course provider accredited by NEBDN
- Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team, and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
- Be able to meet the work-based clinical requirements of the RoC

Record of Competence

You will be required to complete a work-based Record of Competence (RoC). There are four sections to the RoC:

- Practical Competence Assessment Sheets (PCAS)
- Case studies
- Directly Observed Clinical Skills (DOCS) Assessments
- Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

“Implant Dentistry is a highly advanced, specialised dental skill which is now a widely available treatment across the UK and overseas.”
Case studies

The case studies enable you to describe in more detail the cases you have been involved in. You will be required to demonstrate your role in the management of the patient.

DOCS

This section of the RoC will enable you to demonstrate your practical competence based on objective assessments of real work activities.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.

Examination

This is a 90-minute written examination composed of two sections:

- Part A – 50 multiple choice questions (MCQ)
- Part B – 30 extended matching questions (EMQ)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.

Award of qualification

In order to be awarded this qualification you must:

- Complete and satisfy the requirements of the RoC
- Pass the examination

Further information

You will find additional information about this qualification on our website at www.nebdn.org including the full syllabus and contact details for all our accredited course providers.
A qualified dental nurse who is awarded the NEBDN certificate in Dental Radiography, will be able to act under prescription as an IR(ME)R operator, in order to safely take intra-oral and extra-oral radiographs of patients. The additional skills acquired, together with the knowledge gained, will enhance your CV and bring benefits to your employer and to patients.

This qualification permits a dental nurse to work autonomously whilst still under the direction of the clinician and whilst working within current UK legislation regarding ionising radiation. This will enable you to interact with patients very differently to conventional chairside assisting. It can also inspire a sense of responsibility and job satisfaction.

The syllabus for this qualification has been developed and approved by the British Society of Dental and Maxillofacial Radiology making it an educationally robust and rewarding post-registration qualification.

“Being qualified in Dental Radiography enables the dental nurse to interact with patients very differently to conventional chairside assisting.”
Aims

NEBDN aims to provide you with:

• A standardised and quality assured learning experience with one of our accredited course providers
• An independent and objective assessment of theoretical and practical knowledge
• A portfolio of evidence of practical experience in the form of a detailed Record of Competence
• A nationally recognised qualification
• The knowledge and skills to safely take intra-oral and extra-oral radiographs

Who is it for?

Registered dental nurses who would like to be more involved with patient care and would like to support their dentists in the diagnosis and treatment planning by providing good diagnostic radiographs.

What are the benefits?

• Our qualifications are nationally recognised by employers.
• Our course providers are accredited against our standards ensuring that you get a full supported learning experience and the best preparation for practice.
• Our formal assessment and Record of Competence are based on modern educational practice, giving you evidence of your fitness to practice.
• Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
• Our Post-Registration qualifications support personal development and enhance skills for career progression.
Entry requirements

You must:

- Be registered with the General Dental Council or the Irish Dental Council
- Be enrolled with a course provider accredited by NEBDN
- Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
- Be able to meet the work-based clinical requirements of the RoC

Record of Competence

You will be required to complete a work-based Record of Competence (RoC). There are three sections to the RoC

- Practical Competence Assessment Sheets (PCAS)
- Case studies
- Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

“This highly regarded qualification permits a dental nurse to work autonomously, whilst working under a prescription and direction of the clinician.”
Case studies

The case studies enable you to describe in more detail the cases you have been involved in. You will be required to demonstrate your role in the management of the patient.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.

Examination

This is a 90-minute written examination composed of two sections:

- Part A – 60 multiple choice questions (MCQs)
- Part B – 15 extended matching questions (EMQs)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.

Award of qualification

In order to be awarded this qualification you must:

- Complete and satisfy the requirements of the RoC
- Pass the examination

Further information

You will find additional information about this qualification on our website at www.nebdn.org including the full syllabus and contact details for all our accredited course providers.
Conscious Sedation is a vital part of modern dentistry enabling a huge number of patients with anxieties and phobias to access care they otherwise could not tolerate. In the UK this involves the administration of sedative drugs which patients may take orally, inhale or have injected. As well as removing anxiety these drugs can have many significant side effects which the dental team must be able to recognise and manage in a calm and effective way.

‘Standards for Sedation in the Provision of Dental Care’ is the current guidance relating to the safe practice of sedation in the UK and the training requirements for those clinical team members directly involved. NEBDN’s Dental Sedation Nursing qualifications have been designed to support dental nurses to meet all the requirements of this important document.

The role of the dental sedation nurse is to work closely with the dentist providing the sedation. In addition to their other duties the dental sedation nurse will:

- Prepare the surgery
- Ensure equipment is functioning correctly and is ready to use
- Ensure that any drugs are checked and prepared
- Support the patient, providing reassurance and information while performing constant monitoring of their health and wellbeing
- Be ready and competent to help manage any complications and emergencies

“Conscious Sedation is a vital part of modern dentistry enabling the huge number of patients with anxieties and phobias to access care they otherwise couldn’t tolerate.”

**Options**

All our dental sedation qualifications will require you to achieve a balanced mixture of knowledge and practical skills, as well as demonstrating an appropriate professional attitude. To ensure our dental sedation qualifications reflect the areas of practice the dental nurse works in, we offer the following three options:

**Certificate in Dental Sedation Nursing**

This qualification is for nurses who are able to demonstrate significant experience in all types of dental sedation. It would also be suitable as an initial qualification for nurses who wish to undertake further training and experience to be able to work with patients under Oral and/or Trans-mucosal Sedation.

**Award in Inhalation Sedation Dental Nursing**

This qualification is appropriate to nurses working within a practice offering inhalation sedation. It would also be suitable as an initial qualification for nurses who wish to undertake further training and experience to be able to work with patients under Oral and/or Trans-mucosal Sedation.

**Award in Intravenous Sedation Dental Nursing**

This qualification is appropriate to nurses working within a practice offering intravenous sedation. It would also be suitable as an initial qualification for nurses who wish to undertake further training and experience to be able to work with patients under Oral and/or Trans-mucosal Sedation.

All three qualifications are at the same level. The titles ‘Award’ and ‘Certificate’ indicate the difference in the number of learning hours required to complete each qualification.

**The validity of the RoC will allow a maximum of two resits, candidates who fail a second resit will need to re-register with a course provider.**
Aims

NEBDN aims to provide you with:

- A standardised and quality assured learning experience with one of our accredited course providers
- An independent and objective assessment of knowledge, meeting the requirements of ‘Standards in Conscious Sedation in the Provision of Dental Care’
- A portfolio of evidence of practical experience in the form of a detailed RoC including:
  - the confidence and skills to provide the initial management of a medical emergency
  - the ability to effectively monitor sedated patients both clinically and electromechanically
  - to be able to interpret the results and communicate their findings appropriately
  - to be able to assist during all aspects of treatment under conscious sedation in dental practice
- A nationally recognised qualification

What are the benefits?

- Our qualifications are nationally recognised by employers.
- The NEBDN qualifications are the Intercollegiate Advisory Committee for Sedation in Dentistry (IACSD) benchmark for Dental Sedation Nurses.
- Our course providers are accredited against our standards ensuring that you get a fully supported learning experience and the best preparation for practice.
- Our syllabus is approved by the IACSD.
- Our formal assessment and RoC are based on modern educational practice, giving you excellent evidence of your fitness to practice.
- Accessibility - you can select the qualification which best fits your area of practice reducing barriers to training.
- Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
- You will be supported to develop skills which other types of training may not include - for example simple audit, removal of cannulas, dealing with ethical dilemmas.
- Our Post-Registration qualifications support personal development and enhance skills for career progression.

Who is it for?

These qualifications are for any dental nurse acting as the ‘second appropriate person’ during the treatment of patients under conscious sedation. You are required to have met the requirements laid out in the guidance ‘Standards for Sedation in the Provision of Dental Care’. The NEBDN qualifications are a nationally recognised route to meeting these standards.

You will need to decide at the start, which of the three qualifications is appropriate to your clinical practice.

Entry requirements

You must:

- Be registered with the General Dental Council or the Irish Dental Council
- Be enrolled with a course provider accredited by NEBDN
- Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
- Be able to meet the work-based clinical requirements of the RoC
Record of Competence

You will be required to complete a work-based Record of Competence (RoC). The requirements for this will vary depending on which qualification you are registered for. There are four sections to the RoC:

- Practical Competence Assessment Sheets (PCAS)
- Case studies
- Directly Observed Clinical Skills (DOCS) Assessments
- Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in during both treatment and recovery. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

Case studies

The case studies enable you to describe in more detail the cases you have been involved in. You will be required to demonstrate your role in the management of the patient.

DOCS

This section of the RoC will enable you to demonstrate your practical competence based on objective assessments of real work activities.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.

Examination

This is a 90-minute written examination composed of two sections:

- Part A – 45 multiple choice questions (MCQ)
- Part B – 30 extended matching questions (EMQ)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.

Award of qualification

In order to be awarded this qualification you must:

- Complete and satisfy the requirements of the RoC
- Pass the examination

Further information

You will find additional information about this qualification on our website at www.nebdn.org including the full syllabus and contact details for all our accredited course providers.
An oral health educator has an important and valuable role within a dental practice to promote good oral health care and work with patients to help prevent oral disease.

The NEBDN Certificate in Oral Health Education is specifically designed to equip a dental nurse wishing to develop professionally to become an oral health educator, with the knowledge and skills required to be able to effectively deliver oral health care messages, educate various patient groups and have the ability to adapt information and communication to the specific needs of the patient. Motivating and educating patients to make positive changes to their oral health care can be challenging, therefore this qualification also covers how to help patients change their behaviour and understand the causes of dental disease.

Undertaking this qualification will also help to develop your communication skills, which is essential for delivering oral health education and being an effective educator.

“"The main focus of the qualification is based on learning the communication skills required to educate patients about their oral health.""
Aims

NEBDN aims to provide you with:

- A standardised and quality assured learning experience with one of our accredited course providers
- An independent and objective assessment of knowledge
- A portfolio of evidence of practical experience in the form of a detailed RoC
- A nationally recognised qualification

Who is it for?

Registered dental nurses who wish to further their knowledge and specialise in Oral Health Education, enabling them to take a more active role in the promotion of Oral Health.

What are the benefits?

- Our qualifications are nationally recognised by employers.
- Our course providers are accredited against our standards ensuring that you get a fully supported learning experience and the best preparation for practice.
- Our formal assessment and RoC are based on the best modern educational practice giving you excellent evidence of your fitness to practice.
- Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
- Our Post-Registration qualifications support personal development and enhance skills for career progression.
Entry requirements

You must:

• Be registered with the General Dental Council or the Irish Dental Council
• Be enrolled with a course provider accredited by NEBDN
• Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
• Be able to meet the work-based clinical requirements of the RoC

Record of Competence

You will be required to complete a work-based Record of Competence (RoC). There are three sections to the RoC.

• Practical Competence Assessment Sheets (PCAS)
• Case studies
• Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

“An Oral Health Educator has an important role within the practice to promote good oral health care and to work with patients to help prevent oral disease.”
Case studies

The case studies enable you to describe in more detail the cases you have been involved in. You will be required to create and evaluate an educational display alongside demonstrating your role in the management of the patient.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.

Examination

This is a 90-minute written examination composed of two sections:

- Part A – 45 multiple choice questions (MCQ)
- Part B – 30 extended matching questions (EMQ)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.

Award of qualification

In order to be awarded this qualification you must:

- Complete and satisfy the requirements of the RoC
- Pass the examination

Further information

You will find additional information about this qualification on our website at www.nebdn.org including the full syllabus and contact details for all our accredited course providers.
The NEBDN Certificate in Orthodontic Dental Nursing is one of our post-registration qualifications aimed at registered dental nurses in specialist practice, where skills and knowledge above general dental nursing training would be advantageous in the workplace.

The theoretical learning covers the biological background to orthodontics and encompasses the various appliances used today and how to maintain them. This qualification also emphasises the medico-legal aspects of treatment and the importance of good communication between patient and the dental team.

This qualification includes the use of standard Edgewise systems and functional appliances which are used in specialist practices. The course syllabus supports the use of dental photography which is an important aspect of good clinical practice. In addition, the orthodontics nurse will learn a mixture of treatment styles using removable appliances such as wire orthodontic techniques which are widely used in many practices.

Successful completion of this qualification will enhance your professional development and provide evidence to employers that you have had thorough training in this specialist area.

“The course syllabus supports the use of dental photography which is an important aspect of good clinical practice.”
Aims

NEBDN aims to provide you with:

- A standardised and quality assured learning experience with one of our accredited course providers
- An independent and objective assessment of knowledge
- A portfolio of evidence of practical experience in the form of a detailed RoC
- A nationally recognised qualification

Who is it for?

This qualification is suitable for any registered dental nurses who aspire to assist in orthodontic procedures.

What are the benefits?

- Our qualifications are nationally recognised by employers.
- Our course providers are accredited against our standards ensuring that you get a fully supported learning experience and the best preparation for practice.
- Our formal assessment and RoC are based on modern educational practice, giving you excellent evidence of your fitness to practice.
- Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
- Our Post-Registration qualifications support personal development and enhance skills for career progression.
Entry requirements

You must:

- Be registered with the General Dental Council or the Irish Dental Council
- Be enrolled with a course provider accredited by NEBDN
- Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
- Be able to meet the work-based clinical requirements of the RoC

Record of Competence

You will be required to complete a work-based Record of Competence (RoC). There are four sections to the RoC:

- Practical Competence Assessment Sheets (PCAS)
- Case studies
- Directly Observed Clinical Skills (DOCS) Assessments
- Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

Case studies

The case studies enable you to describe in more detail the cases you have been involved in. You will be required to demonstrate your role in the management of the patient.
DOCS

This section of the RoC will enable you to demonstrate your practical competence based on objective assessments of real work activities.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.

Examination

This is a 90-minute written examination composed of two sections:

- Part A – 45 multiple choice questions (MCQ)
- Part B – 30 extended matching questions (EMQ)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.

Award of qualification

In order to be awarded this qualification you must:

- Complete and satisfy the requirements of the RoC
- Pass the examination

Further information

You will find additional information about this qualification on our website at www.nebdn.org including the full syllabus and contact details for all our accredited course providers.
Certificate in Special Care Dental Nursing

Special Care Dentistry is about providing and enabling the delivery of oral care for people with additional needs.

The NEBDN Certificate in Special Care Dental Nursing is a qualification suitable for dental nurses who help to care for people whose health and social needs may require special oral health provision. The syllabus is structured to ensure that you receive a broad range of knowledge and understanding relevant to special care dentistry. This includes social and ethical issues, together with a working knowledge of the relevant current legislation and guidance.

You will study conditions of impairment and disability such as Down’s syndrome, autism and cerebral palsy. You will study acquired disability in adults e.g. rheumatoid arthritis and multiple sclerosis, and study medically compromising conditions e.g. bleeding disorders and cardiovascular disease. Mental health impairments such as schizophrenia are also covered.

Through this qualification you will gain knowledge and understanding of the importance of an effective team approach to person centered oral care.

“Significant numbers of people in our communities live with disability and many have complex additional needs. Good oral health can make a difference to quality of life.”
Aims

NEBDN aims to provide you with:

- A standardised and quality assured learning experience with one of our course providers
- An independent and objective assessment of knowledge
- A portfolio of evidence of practical experience in the form of a detailed RoC
- A nationally recognised qualification
- The knowledge and experience to fulfil the role of a special care dental nurse with confidence and competence

Who is it for?

This qualification is suitable for registered dental nurses who help to care for people whose health and social needs may require special oral health provision.

What are the benefits?

- Our qualifications are nationally recognised by employers.
- Our course providers are accredited against our standards ensuring that you get a fully supported learning experience and the best preparation for practice.
- Our formal assessment and RoC are based on the best modern educational practice giving you excellent evidence of your fitness to practice.
- Practical skills are assessed on real life activities within the workplace using objective tools to ensure a standardised approach.
- Our Post-Registration qualifications support personal development and enhance skills for career progression.

Entry requirements

You must:

- Be registered with the General Dental Council or the Irish Dental Council
- Be enrolled with a course provider accredited by NEBDN
- Be sufficiently fluent in written and spoken English to communicate effectively with patients, their relatives, the dental team and other healthcare professionals in the UK (GDC Standards for the Dental Team, 2.1.2)
- Be able to meet the work-based clinical requirements of the RoC
Record of Competence

You will be required to complete a work-based Record of Competence (RoC). There are four sections to the RoC:

- Practical Competence Assessment Sheets (PCAS)
- Case studies
- Directly Observed Clinical Skills (DOCS) Assessments
- Supplementary outcomes

PCAS

These logs of experience will enable you to capture vital information about the cases you are involved in. Your workplace witness will grade your general performance against a number of competencies and you will reflect on your own performance and skills.

Case studies

The case study enables you to describe in more detail a case you have been involved in. You will be required to demonstrate your role in the management of the patient.

DOCS

This section of the RoC will enable you to demonstrate your practical competence based on objective assessments of real work activities.

Supplementary outcomes

The final section of the RoC will enable you to demonstrate further evidence of your fitness to practice.
Examination

This is a 90-minute written examination composed of two sections:

- Part A – 45 multiple choice questions (MCQ)
- Part B – 30 extended matching questions (EMQ)

Examinations are held twice a year in March and September. Examination dates can be found on our website under the qualifications section.
